

Product: PIGS' CHIN - Technical Data Sheet

Composition: 100% pork
Origin: Belgium
Shelf life: 12 months

Naturally dried pig's chins without additives are a product we designed for the smaller breeds. Pigs' ears are often cut into smaller pieces as an alternative for smaller dogs. But because pigs' chins do not contain cartilage and are, therefore, less hard, they are the better option.

The puffed variety is prepared using the same procedure as our ears and noses, making them lighter and easier to handle for dogs with weaker teeth. Our lengthy, high-temperature drying process ensures that any bacteria present do not survive.
